WORK EXPERIENCE

Senior Software Engineer

A.P Moller Maersk, Bangalore, India

May 2021– Present

Working as a fullstack developer, my responsibilities include:

- Working on backend stories using .net core 3.2 and .net 6 and some amount of NodeJs.
- Working on frontend stories using ReactJs and Angular.
- Creating microservices applications using Kafka as backbone.
- Creating build and deployment pipelines in Azure DevOps
- Creating new monitors and alerts in DataDog
- Working with AKS (Azure Kubernetes Services) for trouble shooting as well as some manual deployments
- Creating Terraform projects for creating new resources in azure.
- Adding various metrics and dimensions to Applnsights and creating graphs using the data in Graphana.
- Following Scrum as the development practice.

Senior Software Engineer

HCL Technologies Malaysia, Kuala Lumpur, Kuala Lumpur

Oct 2019 – May 2021

- Leading an agile team of 6 working on a product in the finance domain for an HCL client.
- Plan and create Application Design documents in confluence for each module which would then be used by my team and I to do the actual development.
- Set up the current framework using NextJs and Redux saga. - Working on the rest API endpoints using NodeJs and Express for one project as well as .net core 3.1 and little java for another.
- Serve as a basic troubleshooter and explorer for anything related to react and node. - Jenkins deployment of both front end and backend projects.
- Creating Architecture documents in Confluence.
- Created code quality guidelines along with client to ensure only clean code gets committed after 2 rounds of review.
- Git repo maintenance.
- Worked on FPX payment (online banking) module.
- Integrated DuitNow(like UPI payments in india) module as well as favorites management

Module Lead

Arcadix Infotech Pvt Ltd., Bangalore, Karnataka

Sep 2017 – Sep 2019

- Led a team of 3 fullstack developers working in React, asp.net core and Nodejs
- Worked on a feature intensive module similar designed to set test questions which could be anything from simple text multiple-choice questions to complicated javascript animated puzzles, with templated page-container-element model.
- Created the custom client-side caching framework built on top of redux.
- Created a fully reusable framework for undoing – redoing actions in react which could be split across components.
- Created drag and drop widgets like those used in Confluence for above project.
- Created a custom Server-side rendering framework using React and Nodejs.
- Created Backend services using .net core, Entity framework and SQL server.
- Major updating of old legacy project in asp.net and jquery to .net core 2.1 and react.
- Created a remote education platform from scratch using .net core, react, Signal R and WebRTC. With web calling done using Twilio and Tokbox.
- Created Architecture documents for each module.
- Azure deployment as App service and VM.
- Limited docker deployments for node projects.

Software Engineer

Codeinks Software Pvt , Bangalore, Karnataka

Apr 2015 – Sep 2017

- Worked on an Ecommerce portal in a team of 4 using ASP.net initially then migrated to Asp.net mvc 4.
- Was responsible for creating Tables and complex queries.
- Created ASPX pages initially then migrated to Controllers, models and views.
- Implemented Authentication and authorization framework using OAuth.
- Integrated PayU payment gateway as well as Unicommerce Inventory and warehouse management system to the website

EDUCATION

Bachelor of Engineering: Computer Science

University of Mumbai

2006 – 2012

Completed with First Class

HSC

Maharashtra State Board

2006

Percentage: 74.33

SSC

CBSE

2004

Percentage: 79.4

KEY SKILLS

- .Net 6, .Net core 3.5
- ReactJs
- NodeJs
- Javascript
- Angular
- Kubernetes
- Azure
- Azure Devops
- Terraform
- CI/CD
- SQL Server
- CosmosDb
- Git
- WebRtc
